

# amazon bet

The TL;DR version of this review is: surprising light, extremely pocketable, does the job, not my dream charger but at 7, £ the price it's well worth it.

We've covered a product of Lepow's before, the Moonstone. Like the Moonstone, the Poki comes 7, £ with a cloth carrying case that you can stash a USB cable in (it appears to come with a 6 + 7, £ USB-& MicroUSB,) or chuck your ID and credit card in and use it as a wallet while you're out. It's 7, £ actually the first thing that stood out when I was looking at the device. The Moonstone is still going strong 7, £ with a friend of mine a year later.

The battery delivers a 90% conversion efficiency rating according to specs on the 7, £ manufacturer's website. Most batteries go from the high 70's to mid 80's. You want to see a higher number as 7, £ this is how much power gets delivered with the rest being lost in conversion.

The Poki can charge and recharge at 7, £ 2.1amps. This means you're not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should 7, £ be able to charge this in under five hours and with 90% conversion efficiency you should have around 9000mAh of 7, £ actual juice to spare. That should be enough for at least three complete charges from dead to full for any 7, £ smartphone on the market today.

2.1 amp charging also means you're not going to spend ~7 hours charging a 3000mA phone 7, £ from dead, more like an hour and a half if your phone supports it.
