Pseudo-Random Number Generator

s (PRNGs) Essentially, PRNGs are algorithms that use mathematic

al formulae or simply precalculated tables to produce sequences of numbers that

appear random. A good example of a PRNG is the linear congruential method.

Introduction to Ran

domness and Random Numbers - RANDOM.ORG

There are no numbers

that are picked more frequently for all random number generators.

And for true (not pseudo-random) number generators the results should match what

ever distribution the values are over, so a normal distribution will pick values

near the mean more frequently than extremal values.

Are there numbers that are more likely to

be picked in random generators ...
