API Call in JavaScript #233; Using t

he fetch() method#233; fetch is a method to call an API in#128200;

JavaScript. It is used to fetch resources from a server. All modern browsers support the fetch method. It is much#128200; easy and simple to use as compared to

XMLHttpRequest.#233;

Making API Calls #233;

ng an API call is#128200; knowing the Uniform Resource Locator (URL) for the ap

plication or server that the API will access#233;.

This is the destinati

on#128200; of the request issued when making an API call. The second step is to

choose which command to send with#128200; the request.#233;
