Formaldehyde, also known as methanal, is an organic
chemical compound and belongs to the aldehyde group of substances. Due to its v
ersatile applicability, it can be found in a large number of different products.

It is mainly used as an adhesive and binder in the construction mat
erials and furniture industry

Adhesive Bonding is the process of joini
ng two surfaces together, usually with the creation of a smooth bond. This may i
nvolve the use of glue, epoxy, or one of a wide range of plastic age
nts which bond either through the evaporation of a solvent or throu
gh curing via heat, time, or pressure.
