How many combinations can a deck of 52 cards make? - Quora

52! is a very large number and represents the  
total number of different combinations of cards that can be created from a deck

of 52 cards. To put this number in perspective, 52! is approximately  $8.06 \times 10^{67}$ ,  
which is much larger than the estimated number of atoms in the observable uni

verse (which is around  $10^{80}$ ).
