Em geral, existem vários métodos para detectar e lidar com valores atípicos. Estes métodos estatísticos, incluindo:

- Métodos gráficos, como **caixas plotadas** e diagramas de dispersão;
- Métodos estatísticos, como o **método de Z-score** e o **método de medidas de distância**;
- Métodos robustos, como a **mediana** e o **método do quartil truncado**;

Valores atípicos podem ser importantes, pois podem influenciar significativamente os resultados de uma análise, especialmente se a amostra for pequena. Por isso, é importante detectar e lidar com valores atípicos de forma apropriada, dependendo do objetivo da análise e dos dados.

What happens if a solar flare hits Earth? When solar flares do hit Earth, they can wreak havoc to electronics and communication systems. NOAA warns that GPS systems and radio signals can be disturbed by a solar storm.

Why experts say a solar storm could cause trillions of ... - Deseret News

2024/11/14 : what-is-solar-storm

Very high-energy particles, such as those carried by CMEs, can cause radiation poisoning to humans and other mammals. They would be dangerous to unshielded astronauts, say, astronauts traveling to the moon. Large doses could be fatal. Still, solar storms and their effects are no problem for us on Earth's surface.
