Atlético na La Liga no; Predicting a draw game can be quite challenging, but it is not impossible. In soccer, for instance, a draw game can be predicted by analyzing the statistics of past performances of both teams. One important factor to consider is the teams' win-draw-loss record. If both teams have a similar record, it is more likely that the game will end in a draw. Another important factor is the average number of goals scored and conceded by both teams. If both teams have a low goal average, a draw becomes more probable.

Furthermore, the playing style of both teams is crucial in predicting a draw. If both teams are defensive-minded and are known for their strong defense, the probability of a draw increases. Conversely, if both teams are offensive-minded and have potent attacks, a high-scoring draw can be predicted.
