Geometry Dash Deluxe (GD DX) is an expansion pack for Geometry Dash. For mobile users, it is a separate game for ages 17+ and includes exclusive levels! Geometry Dash Deluxe is a geography-themed expansion pack for Geometry Dash. It includes new levels, skins, and more. It is available for purchase on the Google Play Store and the Apple App Store.

While St. Nicolas rewards innocent children by leaving gifts in their stockings, Krampus beats and polishes naughty children's shoes. In some cases, he is said to take them from hell! Krampus (Definition, History, and more) is a mythical creature from Central Europe. He is often depicted as a devil-like figure with horns, a tail, and a pitchfork. He is said to punish naughty children by beating them with a stick or taking them to hell.

Be aware of the excessive violence and crude language throughout the film. Depending on the child, Krampus is a scary figure. As probabilities are shown as a decimal, the amount that a winning bet would return is the probability multiplied by the amount bet. For example, a 6% chance of winning a \$1 bet would return \$1.06. A 2% chance of winning a \$1 bet would return \$1.02. A 0% chance of winning a \$1 bet would return \$1.00.

To calculate the chance of a bet, divide the amount bet by the amount returned. For example, a \$1 bet that returns \$1.06 has a 6% chance of winning. A \$1 bet that returns \$1.02 has a 2% chance of winning. A \$1 bet that returns \$1.00 has a 0% chance of winning.

Comumente usado em apostas esportivas, o decimal apresenta um número que indica quantas unidades do seu tamanho de aposta total você receberá, apostando 1 unidade.
