The website crash may occur because of a caching is

sue. In this case, users can access the site, but it fails to load on your end.

To fix it, clear the browser cache and refresh the page

. Alternatively, change to a different network.

Why Do Websites Crash? Common Causes and How to

Prevent Them

hostinger : tutorials : why-do-websites-crash

There are several reasons a website can crash, including

broken code, malicious attacks and hosting errors.

Another big reason websites can go down is massive traffic. Every website can crash, but knowing what caused the crash can help you fix it quickly.
