The Cacaniquel is a type of slot machine that originated in France, which spread to various parts of the world. The name "Cacaniquel" was derived from the French word "quiné", which means "lottery". In the Cacaniquel, players buy tickets with random numbers, and a presenter will draw balls from a drum. When the number drawn corresponds to one of the numbers on the player's ticket, they win.

In the Cacaniquel, the presenter plays an important role in determining the winner. However, some players believe that there are strategies that can increase their chances of winning - such as choosing tickets with more numbers that appear more frequently during previous drawings. In Portugal, however, there is evidence of illegal betting on the Cacaniquel in some regions.

In some places, the Cacaniquel is regulated and offered in slot machines in casinos or other licensed venues. In other places, however, it is illegal to offer this type of game in establishments. The Cacaniquel was first introduced in Portugal in 1991.
